

AADHISH S

Data Analyst & BI Developer

Chennai, India | 9544012187 | aadhishs007@gmail.com | linkedin.com/in/aadhish-s

PROFESSIONAL SUMMARY

Results-driven Data Analyst and BI Developer with hands-on experience delivering production-grade business intelligence solutions. Specialized in Qlik Sense dashboard development, write-back automation, Snowflake integration, and cloud-based data platforms. Proven ability to own projects end-to-end, from data ingestion and modeling to visualization, deployment, and hypercare support for global stakeholders.

TECHNICAL SKILLS

- BI Tools: Qlik Sense, Power BI, Tableau, Automation, Writeback
- Programming: Python, SQL
- Cloud Services: AWS EC2, RDS, S3, CloudWatch
- Data Platforms: Snowflake, Databricks, MySQL, Excel
- Orchestration: Apache Airflow
- Other: JIRA, UAT/SIT, Data Validation, Data Modeling, Data Analysis, Mashup (Basic), Machine Learning

PROFESSIONAL EXPERIENCE

Data Analyst & BI Developer – Fipsar Solutions, Chennai | Mar 2025 – Present

Field User Reporting Dashboard with Writeback (Qlik Sense, Automation, Snowflake)

- Architected and delivered a reporting dashboard with write-back functionality for field users (MOL/MSL roles), a first-of-its-kind solution within the organization.
- Enabled real-time data capture through dashboard input fields, allowing field teams to submit operational data directly from the BI application.
- Implemented Qlik Sense Automation workflows to securely fetch user-entered data via input blocks and process submissions.
- Designed and created Snowflake tables to store writeback data, ensuring schema consistency, data integrity, and scalability.
- Integrated backend writeback data into frontend dashboards using automated reload mechanisms for near real-time reporting.
- Independently researched, designed, and implemented the complete end-to-end write-back architecture.
- Deployed the solution to production, delivering a stable and scalable reporting system for field operations.

Global Field Medical Leadership Dashboard (Qlik Sense)

- Designed and developed an end-to-end Global Field Medical Leadership dashboard using Qlik Sense, supporting stakeholders across US and EMEA regions.
- Built four interactive analytical sheets providing insights into medical experts, engagements, MIRFs, interactions, and operational metrics.
- Owned the complete data lifecycle independently, including data extraction, transformation, data modeling, and front-end visualization.
- Developed optimized Qlik load scripts to integrate and manage large-scale global datasets with high performance and accuracy.
- Implemented KPIs, filters, and drill-downs to help leadership track operational status and expert engagement trends.
- Successfully deployed the application to production and provided post-deployment hypercare support to ensure smooth adoption.
- Collaborated closely with business stakeholders to gather requirements, validate insights, and deliver a scalable BI solution.

Enterprise BI Dashboards & Reporting Solutions

- Joined the BI team as a fresher on a critical enterprise-level dashboard project for an international client.
- Designed and deployed multiple production-ready Qlik Sense applications.
- Built a Channel Management dashboard integrating shipping, inventory, and multi-domain business data using complex joins and aggregations.
- Developed a Quarterly Review dashboard focused on leadership-level KPIs and performance trends.
- Wrote optimized SQL queries for data validation, model accuracy checks, and logic debugging across large datasets.
- Performed SIT and UAT to ensure business alignment, data accuracy, and production readiness.
- Maintained clear documentation covering application logic, validation steps, and user workflows.
- Participated in client calls, translating business feedback into functional and visual enhancements.
- Used JIRA for sprint tracking, issue resolution, and agile collaboration.
- Delivered all applications on time with zero critical defects and received positive feedback for quality and initiative.
- Contributed as part of the Hypercare team, supporting post-production stability.
- Applied statistical methods to analyze data and generate actionable business reports.

EDUCATION

B.Tech in Computer Science – Mahaguru Institute of Technology, Kerala | 2024 | CGPA: 7.68/10
